

## About free directory submission

Choosing the right category is crucial. Submitting in deep categories increases your chance to be accepted, and your chance to be listed with better rank, in related content page. Most of directories deny submission in top categories.

But some directory need at least a manual action : a code is required, no matching category was founded, or submission processes in several steps... If only a captcha code is required, submission can be done within Captcha Submission. You enter the code, click and the submission will process, and you are automatically invited to enter a new code for the next directory. It is very fast !
